

Except You And Me - Stumpy, 1 3 7 4 FLASH July 2022

Well it's an [A] awkward place to tell our tale
But [C] you're all listening and you want it to be real
So just a[G]nother drink and leave it to me
With a [D] little bit of luck I'll sing our history

It was a [A] long time ago, when we would never say no
We [C] wound ourselves together tied a knot through our hearts
Not [G] looking to our left, not looking to our right
Not [D] caring who we burned setting fire to the night

Did we [A] wonder is it love, did we wonder is it right
Did it [C] bother us to steal like thieves through the night
Don't re[G]member having doubts, just remember having thirst
And [D] feeling any moment my lungs might burst

I can re[A]live every moment, can relive every touch
What you [C] wore, what you smelled like, how my hand you would clutch
The [G] sky would open, air smell like the sea
And [D] nothing really matter except you and me
